## Maximise your efficiency gains through consistent outsourcing.

Profidata Managed Solutions provides a wide range of services, from hosting solutions to business process outsourcing services. Our customers have the option to choose their operating model for XENTIS and the service scope is customisable.

## Xcloud – Software as a Service

Managed Services takes the responsibility of the entire IT infrastructure of the Profidata applications and operates them for you. The Xcloud is operated in a highly secure private cloud infrastructure that complies with the requirements of the regulatory authorities. Highest quality and security standards are proven by ISAE accreditation.

IT-Infrastructure  
Backup Management  
Security and Patch Management

## Application Management as a Service

Profidata offers application support around XENTIS. Managed Solutions implements processes for you and enables a standardised straight-through process with a high degree of automation.

XENTIS Run Service  
XENTIS Change Service  
Interface Monitoring

## Business Process as a Service

Your non core business tasks are handled in a standardised, cost optimised and professional setup within the Business Process Service. This offers you the option to outsource individual specialist tasks to Profidata. We are continually expanding our range of services.

Shadow Accounting
